Physics A301: Classical Mechanics II

Syllabus and Course Information – Spring 2004

Initial Version – 2004 January 13

Course Information

Lectures:
TR 9:30-10:45am, 450 Monroe, beginning January 13 and ending May 4

Holidays (no lecture):
Feb. 24 & 26: Mardi Gras; Apr. 6 & 8: Easter Break

Textbook:
Mechanics, by Keith R. Symon

Instructor:
Dr. John T. Whelan; 464 Monroe, 865-3641; jtwhelan@loyno.edu (More reliable than voicemail)

Office Hours: TWR 2:00-3:00pm, or by appointment

Prerequisites:
PHYS A300 (Classical Mechanics I)

Scope of Course:
PHYS A301 will cover most of the rest of Symon. Topics expected to be covered are gravity (Ch. 6), moving coordinate systems (Ch. 7), Lagrangian mechanics (Ch. 9), tensor algebra (Ch. 10) and rigid body motion (Ch. 11). Time permitting, we may also study small oscillations and/or relativity.

Exams:
Two preliminary exams, to be given in class.
Final exam to be held Thursday, May 13, 9:00-11:00am.

Homework:
Quasi-weekly problem sets, with due dates posted on the problem sets. Homework will not be accepted after solution sets have been distributed.
Course Website:  http://www.loyno.edu/~jtwhelan/A301/

Course Listserv:  physa301001@loyno.edu
Please subscribe ASAP by sending email to majordomo@loyno.edu with subscribe physa301001
in the body of the message.

All students are expected to be subscribed to the course listserv from address which they read frequently, as organizational announcements may be sent there. Students are also encouraged to use the listserv to discuss concepts and issues related to the course. I will also use the listserv to respond to student questions, so that the entire class can benefit from the exchange. If you email me a question which you don’t want shared with the class, you must specify that explicitly in the email. (Similarly, if you want to ask a question anonymously, specify that you’d like your name left out of any reply posted to the listserv.)

Course Policies

Attendance:
There is no attendance grade for the course, and no penalty for missing class. However, most students will find themselves at a disadvantage on the homeworks and exams if they neglect to take advantage of the full range of tools (including both lectures and reading) to gain understanding of the material.

Class Disruptions:
Please try to avoid disrupting the class by arriving late and/or leaving early. Please switch off all cell phones and beepers if possible. In case of an urgent need to be reachable during 75 minutes of lecture (on-call EMT, critically ill loved one, etc.), please use silent/vibrate mode.

Collaboration:
Collective brainstorming is a time-honored tool of physicists attacking a problem, be they freshmen or tenured professors. That said, working through the homework problems is an important aid to gaining mastery of the material, and a student who simply transcribes the solution of another student or of the group will likely have trouble come exam time. If you do work with others in figuring out how to solve a problem, you are strongly recommended to write out the solution yourself, in your own words, to ensure you understand it.

In the interest of learning proper academic procedures, you should acknowledge any outside help you get on homeworks, whether from other students or from references outside the textbook.

Working together on exams or copying off of someone else’s test is of course cheating and will not be tolerated.
Grades:
Grades will be based on a linear combination of the overall homework grade, prelim exam grades, and final exam grade, each graded on the scale below. Your score on each component of the course (each prelim, the final, and all the homeworks together) will be converted to a numerical “grade point” score, and the weighted average of those four scores will be your final grade, converted to a letter grade according to the scale below. The weights for the final grade will be 20% homework, 20% for each prelim exam, and 40% final exam. Midterm grades will be based on homework to date and the first prelim.

| 3.75–4.5 | A  | 1.75–2.25 | C  |
| 3.25–3.75 | B+ | 1.25–1.75 | D+|
| 2.75–3.25 | B  | 0.75–1.25 | D  |
| 2.25–2.75 | C+ | −0.5–0.75 | F  |

Grading Scale:

Special Arrangements for Students with Disabilities:
Students with disabilities who wish to receive accommodations in this class should contact Disability Services at 865-2990 as soon as possible so that warranted accommodations can be implemented in a timely fashion. Disability Services are located in the Academic Enrichment Center, Monroe Hall 405.
